EDUCATION

FRONT-END DEVELOPMENT

BROTOTYPE, Calicut
2022 - Present

HIGHER SECONDARY

GHSS Vazhakkad, Malappuram
2016 - 2018

SKILLS

LANGUAGES

JavaScript
TypeScript
HTML

FRONT-END

Angular
CSS
Tailwind CSS
Bootstrap

LIBRARIES

NgRX
RxJS
Material UI

BACK-END

Node.js
MongoDB
Express.js

DEV TOOLS

Version Control system - GIT
Visual Studio Code

FAMILIAR WITH

DSA
MySQL
API
AWS
EJS
Figma
jQuery AJAX
Java
MVC

ANGULAR DEVELOPER

As a self-taught Angular developer develop, Design and maintain web applications using Angular, TypeScript, HTML, and CSS. Seeking a challenging role to develop skills.

PROJECTS

CODFORUM | FORUM APPLICATION

CodForum is a single page forum application that provides a platform for developers to ask questions and give answers to others' questions.

- **JWT** tokens are used for Authentication and Authorization purposes.
- Implemented **Angular Material UI** for modern and user-friendly project interfaces.
- **Socket.IO** facilitates real-time commenting and replies.

Technologies used - Angular, Node.js, Express.js, MongoDB, NgRX

Git Repo : [Cod-Forum](#)
Live Demo : [Cod-Forum](#)

CASTILLO | E-COMMERCE APPLICATION

Castillo is an e-commerce platform and built as a server side application using **Node.js** and **Express.js**.

- **Multer** is utilized to enable the addition of images.
- **Razorpay** is utilized to integrated payment option.
- Implemented an order status feature along with options for order cancellation and returns.
- Hosted on an **EC2** instance (**AWS**) and using **Cloudflare** with a subdomain.

Technologies used - Node.js, Express.js, MongoDB, jQuery AJAX, Nodemailer
